

Training

Programs

GENI offers customized training solutions that support employee learning and safety.

Global Environmental Network, Inc. offers a broad range of environmental services, but we never forget that it's all about the people we serve. This is especially true in the training programs we provide.

Our goal is simple- keep workers safe.

GENI recognizes the need for hands-on, practical, and effective health and safety training. Training is like tape – it must “stick” to fulfill its function. Our instructors are professionals with years of relevant work experience. Our materials are always up-to-date. We work with your schedule. We can train your people at YOUR location using YOUR equipment, ensuring that they “get it.” We also offer selected training courses at our own facilities in Oakland and Santa Ana.

Fast Facts

GENI began as a health and safety training company in 1992!

Workplace safety has always been a part of our company culture and we will work to help make it part of yours too.

Our programs are geared towards action based on accurate, reliable, and relevant safety knowledge.

A culture of safety can bring your company reduced work-related injuries and illnesses; improved worker morale and increased productivity; and fewer costly fines. A strong safety program empowers workers and builds trust.
